

Kenya Biogas Program

KBP Strategic Orientation

Kenya Biogas Program (KBP) is the National Implementing Arm (NIA) in Kenya for the Africa Biogas Partnership Program-PPP

Vision:

Green cooking and organic farming for all

Mission:

To facilitate economic viability and sustainability of the domestic biogas sector in Kenya

We value
Professionalism

We value
Excellence

We value
Accountability

We value
Knowledge

KBP Focus Areas

KBP Focus Areas

The current technical potential for domestic biodigester uptake in Kenya is slightly over 2,000,000, households

Demand Generation :

We build a strong business case for farmers that allows them to quantify the benefits accrued and returns on investment from biodigesters adoption

Enterprise Development:

We support establishment of sustainable BCE/Companies to drive the sector's growth and sustainability

Quality and Functionality:

We ensure that all the biodigesters constructed and commissioned under the program are functional

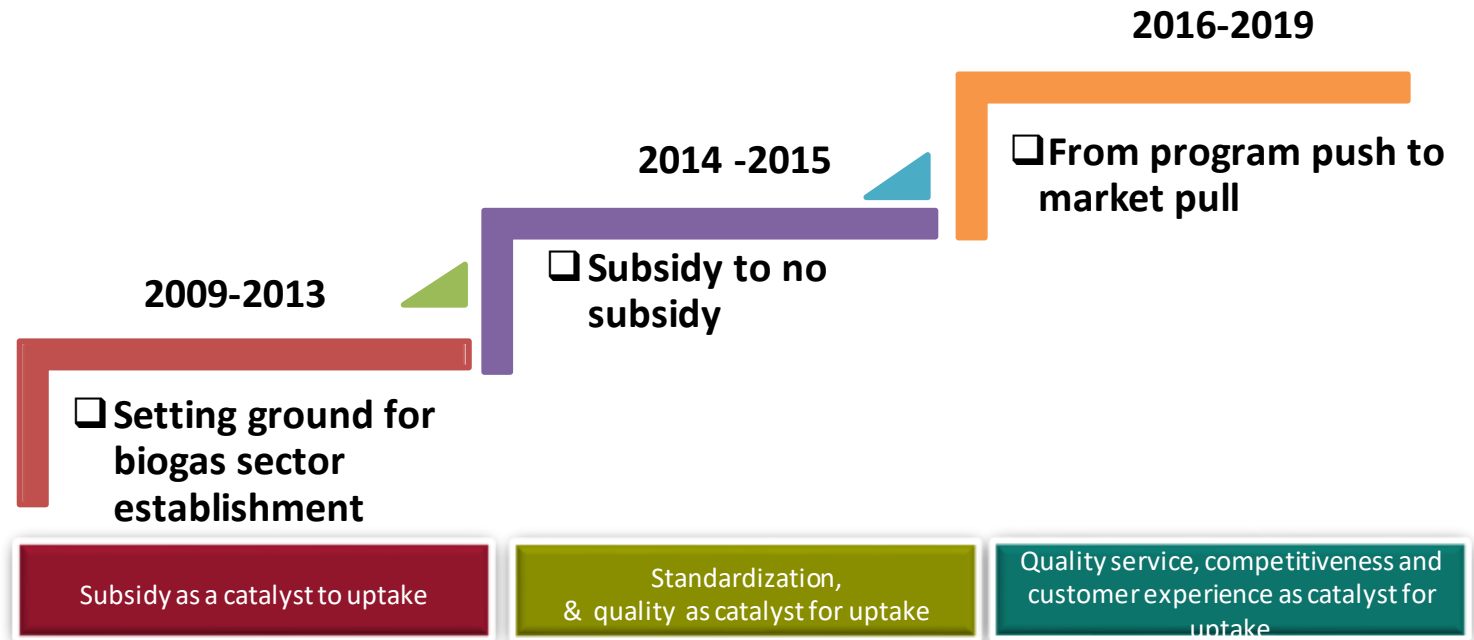

Affordability:

We explore and undertake innovations around technology improvement and credit towards reduction of the cost burden of acquiring a biodigester

KBP's Milestones and Achievements

Our Milestones

- Biogas awareness, interest creation, evaluation, trial, and adoption

- Strengthening the biogas business case for all players in the sector

- Proactive leadership and active participation by private sector in the biogas sector

Current Orientation of KBP ...

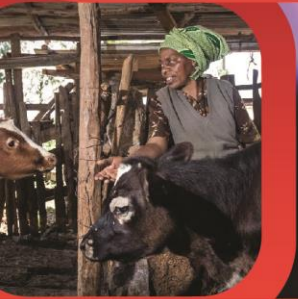

Our scope and Focus

- Currently mainly in high potential areas
- Build footprints in the ASAL
- Shift from a technology focus to thematic focus, looking at;
 - Bio digesters and agriculture (food security and nutrition)
 - Bio digesters and human health(indoor air pollution related illnesses)
 - Bio digesters and environment (emission reduction, soil nutrition , biodiversity)

Our current strategy/Opportunity for Synergies

- Enhanced enterprise capacity development (BEAF)
- Build technical capacity through the CRIBB- Centre for Research and Innovation on Biogas and Bioslurry
- Enhanced bio slurry extension and commercialization (SLE, Biogas academy...)
- Innovative financing for biodigesters (BFA...)
